# Strategic Planning Worksheet Overview

Use this worksheet as you go through the [Community-Led Suicide Prevention web-based toolkit](#). It will help you bring together your progress across the seven elements. In particular, it will help you link your suicide prevention planning with the evidence-informed approaches in CDC's [Suicide Prevention Resource for Action](#).

**Use a new worksheet (with all three sections) for each priority group you choose.** The information in Section 1 will be used in Sections 2 and 3. Some information from Section 2 will be used in Section 3. You can download the worksheet from from <https://communitysuicideprevention.org/worksheet/> and either fill it out on a computer and save it, or print out blank copies and write in your responses by hand.

**This example focuses on one population with seven objectives in order to show how to create multiple types of objectives for different CDC approaches. Your community may have one, two, or three populations that you focus on and may prioritize a different number of objectives.**

*This material was made possible by Cooperative Agreement #NU17CE924917, CFDA: 93.136 from the Centers for Disease Control and Prevention (CDC) through a subcontract from the Safe States Alliance.
